PROFILE I am a highly motivated software engineer with a passion for intuitive workflows and high quality UX design. With a strong work ethic, I not only implement technical solutions, but ensure those solutions are comprehensive and follow best practices.

TECHNICAL SKILLS **Development** | Reactjs · AWS · HTML5 · CSS · JS · Node.js · Express · Angular JS · EJS · Mongoose · Ruby on Rails · Git · JQuery · Alexa
Database | DynamoDB · SQL Server · PostgreSQL · OData · MongoDB
Managerial | Agile Scrum · Project Management · Requirements Research & Documentation

EXPERIENCE **Nike**, Software Engineer (FLEX - ETW) | July '18 – Present
Helped launch the NikeConnect Chelsea experience to encourage jersey co-creation among fans, working specifically on the app's front-end using Reactjs. Worked on the Nike High Five platform, to digitize shout-outs and congratulations among employees. Participated in rapid ideation and prototyping, using women and their future in sport as a lens for tech innovation. Actively building out a concept that was derived from this work, using AWS, Reactjs, and Processing to explore data visualization capabilities.

Self-employed, Freelance Web Developer | Oct '17 – July '18
Created a camping reviews site using Express and Node.js, complete with user login and registration. Built an interactive mancala game for desktops using HTML, CSS, JavaScript, and JQuery.

S&P Global Market Intelligence, Lead Business Analyst | Oct '16 – Oct '17
Resolved work-stopping issues for agile team in a leadership role, as Scrum Master. Reported team health to project stakeholders. Facilitated data migrations between various environments and the transition from our legacy web product to the new Market Intelligence desktop and mobile platforms.

S&P Global Market Intelligence, Senior Business Analyst | Sept '15 – Oct '16
Created web pages using an XML-based report authoring and deployment system. Built SQL and Odata queries to draw content from relational databases on to client-facing web pages. Developed mockups and technical specifications for ongoing projects.

SNL Financial, L.C., Project Manager | Jun '13 – Sep '15
Awarded Most Valuable Player (MVP) during a software release, nominated for MVP during 3 other releases. Performed cross-browser testing and troubleshooting on our business applications alongside QA. Triaged and fixed bugs to further support software releases.

EDUCATION **General Assembly Web Development Immersive**
Remote

University of Virginia
Bachelor of Science Systems & Information Engineering
